Subject: RE: Synthetic biology survey

Dear Mr. Melogno,

I am pleased that you have found my work on public perceptions of biotechnology to be useful and I would be happy for you to adapt the questions to understand public perceptions of synthetic biology. If you are interested in our most recent survey of American's perceptions of biotech, please follow this link: http://humeco.rutgers.edu/documents_PDF/news/GMlabelingperceptions.pdf

Best wishes for a successful research project. If I can be of further assistance, please let me know.

Bill Hallman

Subject: Synthetic biology survey
Importance: High

Dear Dr. Hallman,

I am Lucas Rocha from Zamorano University, located at Honduras and I am currently a junior student on the Environment & Development Department. I am a member of the iGEM (International Genetically Engineered Machine) team for this year's worldwide competition of Synthetic Biology from October 30 to November 3 in Boston, Massachusetts. We are participating on the Policy and Practices" track and as part of this, we want to do a public perception analysis between the student population in different universities from Honduras including Zamorano. For this, We found a paper you published in 1993 (*Public Perceptions of Agricultural Biotechnology: A Survey of New Jersey Residents*) that we found pretty useful and we would like your permission to adapt it to our context as we saw that it's a very well done research that could help us understand the public perception and acceptance on Synthetic Biology nowadays in Honduras.

If you would like more information about our work, please feel free to ask me or Dr. Roca, who is our coach for the competition.

Best regards,

Lucas Rocha Melogno

Development & Environmental Engineering student
